Sir:

PRELIMINARY AMENDMENT

Prior to examination, please amend the application as follows:

IN THE CLAIMS

Add the following claims:

21. (New) Apparatus for compressing a bone graft between adjacent vertebrae,
comprising:

a spinal fixation device including first and second discrete plates having openings
for cooperation with fasteners to secure the plates to respective vertebrae on opposite
sides of the bone graft;

said first and second plates having interlocking elements cooperable to enable
progressive displacement of the plates relative to one another in a first direction to
shorten the distance between the openings of the respective plates and to lock the
